

LEED Green Associate Exam Prep

The LEED Green Associate Exam Prep Course is Tier 1 of 2 and serves as the first step for professionals pursuing a LEED AP specialization.

The LEED AP exam is divided into two parts. The first tier is the LEED Green Associate exam, for professionals who want to demonstrate green building expertise in non-technical fields of practice, which denotes basic knowledge of green design construction and operations.

The following topics will be covered during the session:

- Introduction to Green Buildings, Key Components of the LEED Rating Systems, LEED Certification Process - Buildings and Homes
- Project Site Factors, Water Management
- Project Systems and Energy Impacts, Stakeholder Involvement in Innovation
- Acquisition, Installation and Management of Project Materials, Synergistic Opportunities and LEED Application Process, Project Surroundings, and Public Outreach

This course will prepare you to take the LEED Green Associate exam.
